Git
Bash
Visual Studio Code
Teamwork
Communication

EDUCATION

Certificate of Graduation: Web Development MimoDev

2022-2023

- Completed an intensive full stack web development program.
- Utilized Git workflow on all projects, ensuring version control and efficient team collaboration.
- Successfully completed all curriculum coursework, which included in-depth training in React, Node, JavaScript, HTML, and CSS.

Cal State University, Fullerton

Bachelors of Arts: Philosophy

2018-2021

CAREER OBJECTIVE

Enthusiastic and inquisitive individual with a foundational background in front-end web development, eager to secure a software engineering position. My goal is to apply and enhance my burgeoning skills, problem-solving acumen, and unwavering passion for crafting immersive digital experiences. Leveraging a growing expertise in computer science and practical insights gleaned from an immersive boot camp program, I am committed to actively contributing my knowledge and drive toward the development of pioneering, user-centric software solutions. I aspire to collaborate within a dynamic team, driving innovation and delivering impactful solutions that resonate with users on a meaningful level.

TECHNICAL PROFICIENCY

Programming Languages & Tools:

- Proficient in HTML and CSS for structuring and styling web content, utilizing modern best practices for responsive design.
- Skilled in JavaScript (JS) for implementing dynamic and interactive elements on web pages.
- Experienced in TypeScript to enhance code quality and maintainability in large-scale applications.
- Proficient in using Git for version control, managing repositories, branching, merging, and collaborative development workflows.
- Comfortable with Bash scripting for automation and command-line tasks, enhancing development efficiency.

Front-end Frameworks & Libraries:

- Competent in React to develop scalable and efficient user interfaces, utilizing functional components and state management principles.
- Proficient in Tailwind CSS for rapid UI development, leveraging utility-first styling methodologies for streamlined and customizable designs.
- Skilled in Vite as a build tool, enabling fast and optimized development workflows, leveraging its speed and simplicity.

Database & Deployment:

- Proficient in utilizing Firebase services for database management, authentication, and hosting, enabling seamless deployment and management of web applications.
- Experienced in deploying and hosting web applications using Netlify and Vercel, leveraging their powerful deployment capabilities and continuous integration/continuous deployment (CI/CD) features for efficient and scalable deployment workflows.

Design Collaboration:

- Proficient in Figma for collaborative interface design and prototyping, facilitating seamless communication between design and development teams.

Additional Skills:

- Familiarity with various developer tools, extensions, and debugging techniques to enhance productivity and streamline development processes.
